

My Virtual Safety Trainer™

An immersive training platform designed to support Total Worker Safety

VR Simulations

VR, Mobile, and Desktop

Try MVST for FREE!

40+ micro eLearning courses with interactive media and virtual reality simulations

Developed for Construction and General Industry to onboard employees faster & safer

Designed to educate and empower learners to advocate for their personal safety and wellbeing

No headset, no problem! Immersive training for desktop or mobile devices (iOS and Android)

“

Words alone don't teach. It's through trial & error, life lessons, and experiences that we begin to understand the results we want, and those we don't want. That's when learning begins to take place.

Jennifer Lastra | CEO

Compliant to Federal OSHA Standards

Courseware developed and approved by OSHA-certified instructors with an emphasis on critical safety events that are relevant to your industry.

VR Simulations Increase Engagement

Virtual Reality training allows learners to have fun self-exploring and interacting with realistic environments.

Supports ILT and vILT Instruction

All courses and simulations are customizable, SCORM compliant, and can be accessed for self-paced learning through our LMS, or integrated into your LMS.
